CUTTING EDGE, REDEFINED.

TOUGH, SHARP & LONG LASTING

PERFORMANCE EST. 1959 GB FORESTRY EQUIPMENT

The GB Titanium® LX Harvester Chain is in a class of its own, specifically engineered for harvesters to deliver ultra-long run times without the need for frequent sharpening. Crafted with advanced technology, it maintains its sharpness significantly longer than any other brand on the market. Manufactured at our cutting-edge chain facility in the United Kingdom, every stage of the design and engineering process is focused on optimizing performance and durability in the toughest conditions.

THE FUTURE OF FORESTRY IS HERE

Titanium® LX

The Titanium® LX Harvester Chain has been in development for many years, with extensive feedback from forestry professionals and rigorous product testing across the globe. We've re-engineered the harvester chain to meet the demanding needs of modern harvesting, delivering exceptional performance and unparalleled durability.

Through years of innovation and refinement, the Titanium® LX Harvester Chain has set a new standard for productivity in the forestry industry. During product testing, we've seen Titanium LX chains last as long as 1215m³ without the need for resharpening, a significant improvement over other brands on the market.

This extended edge life means less downtime for sharpening and more time spent cutting, making the Titanium® LX Harvester Chain the ultimate choice for professionals who demand high performance and maximum efficiency in the toughest conditions.

ADVANCED GB HEAT TREATMENT

Advanced heat treatment and tempering processes create a durable, ultra-strong chain for maximum performance.

ENGINEERED FOR HARVESTERS

A chain like no other, 100% purpose-engineered for use on harvesters, allowing you to achieve ultra-long run times without sharpening.

MADE IN UNITED KINGDOM

GB Titanium® LX Harvester Chain is manufactured in the our new state-of- the-art chain factory in the UK.

5 YEARS OF PRODUCT TESTING

Working with forestry professionals from around the world to create the new market leading chain.
